**RESPONSE**

Dear Sir:

In response to the Office Action mailed October 6, 2004 for which a response is due on January 6, 2005, the applicant responds as follows:

The Examiner objected to Figure 16 because it was a color photograph. The applicant has now prepared a line drawing of Figure 16 and is submitting this new Figure with this Response. It is believed that with this submission, the objection to Figure 16 has been met.

The Examiner rejected claims 1-7 under 35 U.S.C. § 101 as claiming the same invention as that of claims 1-7 of prior United States Patent No. 6,626,448. The applicant has submitted claims 1-7 in this application which were copies of claims 1-7 of the '448 patent' with the modification that the words "an operator" was changed to "a user". The reason for this change

was that the claim limitation of "operator" was believed to be unduly restrictive since the invention may also be used by a passenger carried behind the operator of the motorcycle. This is described in the specification on page 8, lines 16 through 21. It is believed that original claims 1-7 of the '448' could be interpreted as being restricted to the operator and not cover the use of this invention by a passenger. My client thought that the claims should be amended to cover both the operator and the passenger. For these reasons, it is believed that claims 1-7 of the present application are allowable as written because the claims 1-7 are not directed to the "same invention" as that set forth in claims 1-7 of the '448' patent.

In view of the foregoing, it is respectfully believed that the application is in condition for allowance.

DATED: January 4, 2005  
Bozeman, Montana

Respectfully submitted,

A large, stylized handwritten signature in black ink, likely belonging to Richard C. Conover, is written over a horizontal line.
